Work

Software Engineer Tech Lead at Google

Jul'23 - now
Warsaw, Poland

I started working in the GKE UI area where I initially joined a team responsible for Anthos cluster lifecycle UI. After 7 months working there, I became a tech lead of a newly formed team responsible for GKE Upgrades UI. Since the beginning of 2025, the team started owning features end-to-end.

Senior Full Stack Engineer at Montro

Oct'19 - Jun'23
Remote

Montro is a pre-owned luxury watches marketplace. I have been working there from the beginning till the first purchases through the platform as lead frontend engineer and senior backend engineer, periodically doing DevOps work, and continue working there.

As a frontend lead, I take application-level technical decisions, advise engineers, review pull requests, and mentor newcomers.

As a full stack engineer, I deliver features on both ends, e.g. payments system, search module, listings scraping system, taxonomy module. Also, I develop and maintain libraries and tools, e.g. configurator of Google Cloud load balancer based on data about registered in Consul services, and solve different types of emerging issues.

Tech stack includes Kotlin/Java + Spring, Golang, Vue + TypeScript, PostgreSQL, Cassandra, Elasticsearch, Kafka, Google Cloud, Terraform, SaltStack, Nomad, Consul, Docker, ELK, Prometheus, Grafana, etc.

Full Stack Engineer at Senior Node

Jan'17 - Jul'20

Minsk, Belarus

Development of server apps (Java/Kotlin + Spring, Node.js), microservices (Golang), client apps (JavaScript, TypeScript, Vue, Angular, React), storages (Neo4j, Cassandra, Redis, MongoDB, MSSQL, PostgreSQL, Hazelcast), infrastructure (Google Cloud, SaltStack, Terraform, Nomad, Consul, etc.), mobile apps (Swift). Development of and contribution into private and open-source libraries and tools.

Education

Belarusian State University of Informatics and Radioelectronics

2014 - 2018

Minsk, Belarus

Bachelor of Computer Science, Faculty of Computer Systems and Networks. Excellent mark, red diploma.

Profile

I am an ambitious guy who is interested in solving challenging tasks with caring about quality. I have a strong technical background based on studying at Belarusian State University of Informatics and Radioelectronics and more than 5 years of production experience on projects including pre-owned

luxury watches marketplace, media platform oriented on nature protection, website builder for creatives.

I can deliver features in single mode as well as in a collaboration with other engineers. Furthermore, I'm able to play a lead role in a technical team.
